

## S355 Hot Rolled Seamless Steel Pipe Carbon Sch40 Astm A312 Gr Tp304 304I

### Our Product Introduction

for more products please visit us on [seamless-steeltube.com](http://seamless-steeltube.com)

#### Basic Information

#### Product Specification

- Name: Hot Rolled Seamless Steel Pipe
- Standard: ASTM A106/A53/API 5L
- Wall Thickness: 3-100mm
- Length: 1-12.5m
- Material: Carbon Steel, Stainless Steel, Alloy Steel, Etc
- Application: Structure Pipe/Fluid Pipe/Gas Pipe/Oil Pipe/Boiler Pipe
- Ends: Plain/Beveled/Threaded/Socketed/Grooved
- Surface Treatment: Black Painting/Galvanized/Anti-Corrosion Coating
- Highlight: sch 40 seamless steel pipe, s355 seamless steel pipe, hot rolled steel pipe

## Product Description

### High Precision 30 Inch A106 Carbon Sch40 Carbon Steel Seamless Steel Pipe Hot Rolled MS Tube

#### Specifications

| item               | value  |
|--------------------|--|
| Standard           | GB/T 8162-1999, GB/T 3089-1982, GB 3087-1999, ASTM A106-2006, ASTM A53-2007, ASTM A1020-2002, ASTM A210-1996, ASTM A182-2001 |
| Grade              | 10MoWVNb, STBA25, STPA25, API J55, A53(A,B), Q235  |
| Product name       | Hot Rolled Seamless Steel Pipe   |
| Wall Thickness     | 3mm - 100mm  |
| Length             | 1-12.5m  |
| Section Shape      | Square or Round  |
| Place of Origin    | China  |
| Technique          | Hot Rolled   |
| Certification      | CE   |
| Surface Treatment  | Black painting/varnished surface,anti-corrosion oil, galvanized or as per required by customer                               |
| Special Pipe       | Thick Wall Pipe  |
| Alloy Or Not       | Non-Alloy  |
| Tolerance          | ±1%  |
| Processing Service | Bending, Welding, Decoiling  |
| Application        | Boiler   |
| Surface            | smooth   |
| Material           | Q195/Q215/Q235/Q345/10#/20#  |

Hot rolled seamless steel pipes have a wide range of applications across various industries due to their superior strength, durability, and versatility. Here are some common applications of hot rolled seamless steel pipes:

**Oil and Gas Industry:** Hot rolled seamless steel pipes are extensively used in the oil and gas sector for transporting fluids and gases under high pressure and temperature conditions. They are used in drilling, production, and transportation of oil and gas, including offshore and onshore applications.

**Construction and Infrastructure:** Hot rolled seamless steel pipes are used in the construction industry for structural purposes. They are commonly used in the construction of buildings, bridges, highways, and other infrastructure projects where high strength and durability are required.

**Mechanical and Engineering Applications:** Hot rolled seamless steel pipes are widely used in various mechanical and engineering applications. They are used for manufacturing machinery, equipment, and mechanical components that require high strength and resistance to stress and corrosion.

**Power Generation:** Hot rolled seamless steel pipes are used in power generation plants, including thermal power plants, nuclear power plants, and renewable energy facilities. They are used for transporting steam, water, and other fluids in power generation processes.

**Automotive Industry:** Hot rolled seamless steel pipes find applications in the automotive industry for manufacturing various components, such as exhaust systems, chassis, and structural parts. They offer excellent formability, strength, and compatibility with welding processes.

**Petrochemical Industry:** Hot rolled seamless steel pipes are used in the petrochemical industry for transporting chemicals, gases, and fluids in refineries, chemical plants, and petrochemical processing facilities. They are resistant to corrosion and high temperatures, making them suitable for such demanding environments.

**Mining and Exploration:** Hot rolled seamless steel pipes are used in the mining industry for various applications, including exploration, extraction, and processing of minerals. They are used in pipelines for transporting ores, slurries, and other mining materials.

**Manufacturing and Fabrication:** Hot rolled seamless steel pipes are utilized in various manufacturing and fabrication processes. They are used for creating structural frameworks, conveyor systems, and other components in industries such as steel fabrication, manufacturing, and industrial machinery.

**Hydraulic Systems:** Hot rolled seamless steel pipes are used in hydraulic systems for transmitting fluid power. They are used in hydraulic cylinders, hydraulic machinery, and equipment that require high-pressure fluid transmission.

**Agriculture and Irrigation:** Hot rolled seamless steel pipes are used in the agricultural sector for irrigation systems, water supply networks, and drainage systems. They are suitable for transporting water, fertilizers, and other agricultural fluids.

## FAQ

Q1. Are you a manufacturer or trader?

We are a manufacturer, and we can have our own factory produced many steel products.

Q2. Whether your company supports Trade Assurance order?

Yes, we can (100% product quality protection; 100% on-time shipment protection; 100% payment protection)

Q3. Can we get the some samples? Any charges?

Yes, you can get available samples in our stock. If the samples from new production, we will charge some reasonable cost, but this amount will be deducted from your first order.

Q4. How do we build up business relations with your company?

Send us your requirement which includes size, coating info, parameters, quantity, destination .

Q5. What is the MOQ?

We can accept small orders. Please feel free to contact us, we can meet your requirements.

Q6. What's your advantage?

With high-quality products and efficient customer service, we adhere to the principle of customer first.

Q7. How long is your delivery time?

Delivered within 15 days after receipt of deposit.
